

MIDDLE SCHOOL SCIENCE

Mrs. Decker

Fall 2018

Welcome Back!

We start the year with measurement and equipment review

What we'll be learning this Fall:

6th grade: Earth Science: Weather & Climate

7th grade: Biology: Linnaeus organizational charts; cell structure & function

8th grade: Chemistry: What is matter; states of matter; atoms, mixtures, & compounds

Chromebooks:

Students will continue to use the Chromebook for a majority of lesson activities and homework. In addition, a new textbook has been purchased for science. This is an online book, with interactive resources and additional practice assignments that can be done online. Audio is also available for much of the textbook, allowing students

to download and listen, or follow along with the book.

Science Fair!

The 7th and 8th grade middle schoolers will be completing an independent project as part of their science class. If they choose, they can enter it into the school science fair.
